

spectra is a young and independent consulting company for the chemical and biocidal industry. Our client base ranges from small and medium-sized enterprises (SMEs) to global players. We are the 360° project partner for developing integrated and tailored-to-needs strategies for the authorisation of biocidal active substances and products in the European Union.

To support our team, spectra is looking for a

Manager Regulatory Affairs Biocides – Natural scientist (m/f/d)

full-time or part-time, permanent contract
in Bad Kreuznach

Role & Responsibility

- Active participation in regulatory projects on European level
- Preparation and defence of biocidal active substance and product dossiers
- Characterisation of biocidal active substances and products with respect to identity, analytical and physical-chemical properties, efficacy as well as (eco)toxicological properties
- Data and information management
- Performance of human health or environmental exposure and risk assessments
- Development of integrated testing strategies, study planning and monitoring in close contact with clients and CROs
- Project management and communication with clients and European authorities

We are looking for a colleague who takes on the new role as a challenge and will continuously grow with the job.

Personality & Qualifications

- University degree (M.Sc., preferably PhD) in life sciences or environmental sciences such as biology, microbiology, molecular biology, biochemistry, chemistry, food chemistry, pharmacy, toxicology, ecotoxicology or related scientific discipline
- 2-3 years of experience with biocides (Regulation (EU) No 528/2012), (eco)toxicology, exposure and risk assessments, or related field
- Strong scientific background combined with the ability to think out of the box
- Fluent in English and German with excellent communication and presentation skills
- Positive, self-motivated and well-organised team-player
- Hands-on personality with a strong work ethic and sense of responsibility

We are looking for a colleague with ample life experience for whom the job is not just a job.

spectra offers

- Cooperative and appreciative working environment
- Modern open space offices with different working and connecting areas
- Free coffee, tea and snacks
- Intensive training on the job with involvement in the projects from day one
- Possibility to grow in a dynamic team with broad scientific expertise
- Full-time or part-time, permanent contract
- Flexible working hours, possibility of mobile working
- Further training and networking opportunities
- Competitive salary with extra benefits and bonuses
- Good public transport connections, job ticket or free parking space
- Regular team events

With spectra both is possible: working in a small, collegial environment and being at the pulse of exciting international projects.

We are looking forward to receiving your application. Feel invited to call us in advance. Please address your questions and documents to
